

REVISION TEST – ANIMALS (2)

1. Task – Classification (10 points)

Put the animals into the correct groups:

common vole, fox, toad, blackbird, snake, honeybee, goldfish, tortoise, owl, slug

a) Vertebrates

- Mammals: _____
- Birds: _____
- Reptiles: _____
- Amphibians: _____
- Fish: _____

b) Invertebrates

2. Task – True or False? (10 points)

1. A common vole is a bird.
 2. The common vole is warm-blooded.
 3. The hummingbird is a bird of prey.
 4. Blackbirds lay eggs.
 5. Tree frogs have moist skin and live part of their life in water.
 6. A fox is a carnivore and hunts mostly at night.
 7. Fish breathe with lungs.
 8. Honeybees have six legs and two wings.
 9. Frogs breathe with lungs when they are young.
 10. An owl is an invertebrate because it can fly.
-

3. Task – Fill in the gaps (10 points)

Use the following words:

fur, feathers, cold-blooded, warm-blooded, grass, insects, burrow, carnivore, gills, moist skin

1. Birds are covered with _____.
2. Fish breathe with _____.
3. The common vole is a small mammal with soft _____.

4. The vole eats plants and _____.
 5. A tree frog has _____ to protect its body.
 6. Snakes are _____ animals.
 7. Mammals are _____ animals.
 8. The common vole lives in a hole underground called a _____.
 9. A fox is a _____ that hunts other animals.
 10. Blackbirds eat worms and _____.
-

4. Task – Short description: Which animal is it? (8 points)

1. It is tiny, has brown fur, eats grass and seeds, and lives in underground tunnels.
→ _____
 2. It is an insect with six legs, collects nectar and pollen, and lives in a hive.
→ _____
 3. It has a long sticky tongue, smooth skin, and begins its life in water as a tadpole.
→ _____
 4. It is a mammal with sharp teeth, a bushy tail, and hunts at night.
→ _____
-

5. Task – Matching (4 points)

Animals:

- | | |
|----------------|--|
| a) common vole | Has scales and swims with fins |
| b) snake | Builds a nest and lays blue or green eggs |
| c) blackbird | Lives in tunnels and eats seeds and plants |
| d) goldfish | Has dry scaly skin and no legs |
-

6. Task – Food Chain (4 points)

Put the organisms in the correct order:

plant – common vole – fox – eagle

1. _____
2. _____
3. _____
4. _____

7. Task – Read and answer (10 points)

The Common Vole

The common vole is a small **mammal**. It has **brown fur**, small eyes and short legs.

Voles are very active and live in **burrows** underground. They make long tunnels and store food inside them. They eat **grass, roots, seeds and some insects**. The common vole is **prey** for many animals, such as foxes, owls and snakes. Female voles can have several litters of babies each year, usually **3–7 young** at a time.

Questions:

1. Is the common vole a mammal or a bird?

-
2. Where does the common vole live?

-
3. What does it eat? Name two things.

-
4. Name one animal that eats (hunts) the vole.

-
5. How many babies can one litter have?
-

8. Task – Label the picture (4 points)

Draw a honey bee and label **5** parts of a **it**:

Total: 60 points
